

An aerial photograph of the Torbay coastline. The image shows a large, turquoise bay with a sandy beach and a promenade. In the background, a dense residential area with many houses and trees covers the hills. To the right, a marina is filled with numerous white sailboats. A small boat is visible in the water, leaving a white wake. The overall scene is bright and sunny.

# Role of Health Protection

## Infection Prevention and Control

Outbreaks  
Zoonotic  
Communications  
Prevention Activity  
Anti-microbial  
Resistance  
Awareness

## Sector specific

Education  
Care Homes  
Complex Lives  
Asylum Seekers and  
Refugees

## Vaccinations and Screening

Childhood  
immunisations  
Seasonal  
vaccinations

## Emergency Planning and Preparedness

Adverse Weather and  
Health Plan (Cold  
and Heat)  
Pandemic Planning  
Plus more!

# Anti-microbial Resistance Awareness

- Antibiotic, Anti-Viral, Anti-fungal and anti-parasitic.
- Increase in resistance as bacteria, viruses, fungi and parasites alter to fight back.
- National and international concern.

# AMR Week – 18<sup>th</sup> – 24<sup>th</sup> November

- Multi-agency event at Torbay Hospital
- Social media comms.
- 2025 Offers to education:
  - Early years – book with resource pack and activity
  - Primary schools – hand washing kit loan
  - Secondary schools – assembly pack with optional delivery
  - Care homes – hand washing kit loan
  - Not too late to book – AMR is 52 weeks of the year!

# E-bug

- Created by UK Health Security Agency (UKHSA)
- Free lesson plans and resource from early years all the way through to key stage 4.
- Supports AMR, hand hygiene, respiratory hygiene and vaccinations.
- <https://www.e-bug.eu/>

# Vaccinations

- Protects health of children and young people now and in the future
- Key part of AMR
- Supports school attendance
- Protects family, friends and school community
